

## Elevate Your Enterprise Security with SecurityBridge

RISE with SAP simplifies IT, boosts efficiency, and accelerates digital transformation by enabling seamless migration to SAP S/4HANA Cloud Private Edition. While SAP manages infrastructure security, application-level security remains your company's responsibility.

**SecurityBridge bridges this critical gap**, offering a certified, native SAP security platform that integrates seamlessly into your environment without additional hardware or complex configuration. It accelerates migration by providing deep insights into your SAP landscape's Security & Compliance state, helping you meet requirements seamlessly while strengthening your overall security posture with minimal disruption.

## Key Features of SecurityBridge

### 1. Shared Responsibility and Identity Management:

Detect suspicious account activity, enforce least-privilege principles, and centralize access control using SAP Cloud Identity Services. Minimize unauthorized actions while maintaining secure user management.

### 2. System Hardening and Compliance:

Gain a 360° security view tailored for RISE with SAP. Ensure compliance with standards like SOX or NIS2 while addressing critical gaps in SAP interfaces and third-party communications.

### 3. Application Security Audit Logging:

Monitor security logs in real-time for insights into activities, anomalies, and data leaks. Extend monitoring to productive environments beyond client 000. Focus on actionable threats with intelligent event correlation.

### 4. Securing Custom Applications and Development:

Safeguard custom applications and integrations with automated pre-deployment vulnerability scans. Monitor applications hosted on SAP BTP to ensure secure and seamless business processes.

### 5. Application Patch and Change Management:

Streamline patching with automated impact analysis and validation in collaboration with SAP ECS. Virtual patching mitigates vulnerabilities until official updates are implemented.

## Why choose SecurityBridge for your RISE with SAP journey?

SecurityBridge aligns with SAP's Shared Responsibility Model to address critical application-layer security gaps. It empowers businesses to **establish a Cybersecurity Command Center**, providing full visibility and control over SAP security responsibilities while enhancing compliance, efficiency, and protection.

By integrating SecurityBridge with RISE with SAP, our solution delivers a secure and compliant foundation for digital transformation. Together, SecurityBridge and RISE with SAP **ensure long-term operational success while enabling businesses to confidently navigate their cloud ERP journey.**

**Empower your enterprise with SecurityBridge to elevate your RISE with SAP journey. Contact us today to learn more and secure your SAP landscape with confidence.**
